

ST MARY'S SCHOOL, ASCOT

Successful coordination of project proposals for a new Upper Sixth Form Accommodation and Pastoral Centre within the Green Belt.

MLA coordinated the planning application for a new Upper Sixth Form Residential Facility at St Mary's School Ascot.

Sensitivities of proposing development within the Green Belt were fully addressed, whilst also explaining the overriding need for additional sixth form accommodation which was considered proportionate to the schools historical development since 1947.

Supporting Design and Access Statement coordination was followed by representation to the Government's National Planning Casework Unit to ensure no Secretary of State "Call-in", given the scale of proposals and Green Belt Context.
