

## THE FORGE, PRIORS DEAN, PETERSFIELD, HAMPSHIRE

Successful pre-acquisition / pre-planning advice – followed by planning and design services in support of a contemporary and sustainable house.

The replacement dwelling at The Forge was designed in response to its AONB and local landscape context – whilst providing a much enhanced energy efficient family home, in scale with its four acre setting and high woodland backdrop.

CaSA

The existing thatched cottage was taken as a starting point and ‘anchor’ for the design within the local landscape setting. The resulting proposals demonstrate both excellent design whilst being environmentally responsive to the local AONB setting, and further justified in terms of home care provision for a severely disabled child whose disability will require care on a lifelong basis.
