

SANDYLANDS

Planning support services and coordination/production of the Design and Access Statement for a replacement dwelling within the Green Belt at Englefield Green in Surrey.

Proposals included a design for a new two storey private residential dwelling, with basement accommodation and underground garaging. The designers of both the new house and the gardens worked closely together to produce a coherent and attractive fusion of built form and garden landscape within the wider parkland character.

The landscape and garden setting proposals improved both visual amenity and biodiversity whilst providing an enhanced and beneficial use of Green Belt land.
